

Journal of the Mexican Chemical Society

Volume Index 52, 2008

Articles

- Perspectives on the Density Functional Theory of Chemical Reactivity
*José L. Gázquez** **3-10**
- Revisiting the Effects of the Molecular Structure in the Kinetics of Electron transfer of Quinones: Kinetic Differences in Structural Isomers
Carlos Frontana and Ignacio González* **11-18**
- von Neumann Entropies Analysis in Hilbert Space for the Dissociation Processes of Homonuclear and Heteronuclear Diatomic Molecules
*Nelson Flores-Gallegos and Rodolfo O. Esquivel** **19-30**
- The Role of the Linearity on the Hydrogen Bond in the Formamide Dimer: a BLYP, B3LYP, and MP2 Study
José-Zeferino Ramírez, Rubicelia Vargas, and Jorge Garza* **31-35**
- Mechanism and Kinetics of the OH• Radical Reaction with Formaldehyde Bound to an Si(OH)₄ Monomer
*Cristina Iuga, Rodolfo Esquivel Olea, and Annik Vivier-Bunge** **36-46**
- Equilibrium Constants Determination of the Species Formation in the Al(III)-H₂O System by Integration of ²⁷Al-NMR Signals and Fitting with Species Fractions
Alberto Rojas-Hernández, Julio César Botello, Ma de Lourdes Pacheco-Hernández, Atilano Gutiérrez, José Manuel Domínguez, Gabriela Espinosa, and María Teresa Ramírez-Silva* **47-53**
- Synthesis, Structure and Magnetic Differences of Two α -Nitronyl Nitroxide Isomers
Araceli Vega, Juan Padilla, Marco Antonio Leyva, María del Jesús Rosales, and Sylvain Bernès* **54-59**
- Shannon Entropies of Atomic Basins and Electron Correlation Effects
Robin P. Sagar, and Minhuy Hô* **60-66**
- Bi and Three-Metallic Electrocatalysts Preparation for Methanol Oxidation
Yara Márquez-Navarro, Laura Galicia,* Víctor Hugo Lara, and Gloria Del Ángel* **67-73**
- Folded Conformations of Maitotoxin
*Myrna H. Matus, Laura Escobar, and Marcelo Galván** **74-77**
- Molecular Speciation Effect on Docking and Drug Design. A Computational Study for Mangiferin, a Carbohydrate-Polyphenol Bioconjugate as a Test Case
Berenice Gómez-Zaleta, Claudia Haydée González-De la Rosa, Gerardo Pérez-Hernández, Hiram I. Beltrán, Felipe Aparicio, Alberto Rojas-Hernández, and Arturo Rojo-Domínguez** **78-87**
- Molecular Dynamics Simulations of the Solubility of H₂S and CO₂ in Water
*Roberto López-Rendón, and José Alejandro** **88-92**
- Molecular adsorption of NO on a Pd₄ cluster: A density functional theory (DFT) study
Virineya Bertin, Gloria del Angel, Marco A. Mora, Enrique Poulain, Oscar Olvera, and Roberto López-Rendón* **93-98**
- Ethane Internal Rotation -Vibrational Hamiltonian
David Ricardo Hidalgo-Olguín, María Villa, María Luisa Senent, and Marco Antonio Mora-Delgado* **99-102**
- Antioxidant Constituents of *Geranium bellum* Rose
Abelardo Camacho-Luis, Juan A. Gayosso-De-Lucio, J. Martín Torres-Valencia, José L. Muñoz-Sánchez,* Ernesto Alarcón-Hernández, Rogelio López, Blanca L. Barrón* **103-107**
- Thermodynamics and Kinetic Studies of Iron (III) Adsorption by Olive Cake in a Batch System
Zaid Ahmed Al-Anber, and Mohammed A. S. Al-Anber* **108-115**
- Synthesis and Characterization of a New Oxidation Reagent: Tetrahexylammonium Chlorochromate, (C₆H₁₃)₄N[CrO₃Cl]
Behnam Koohestani, Zahra Javanshir, Shahriare Ghamamy, Kheyrollah Mehrani, Hamid Afrand, and Lotfali Saghatforoush* **116-119**
- Quantitative Determination of Olanzapine in Pharmaceutical Preparations by HPLC
Kanakapura Basavaiah, Anil kumar Urdigere Rangachar, and Kalsang Tharpa* **120-124**
- Synthesis and Characterization of Natural Abundance and Isotopically Labeled 1,4-Bis(3,3,3-triphenylpropynyl)-2,3-difluorobenzene. A Molecular Gyroscope with a Polar Rotator
Rosa Santillán, Steven D. Karlen, Hung Dang, and Miguel A. Garcia-Garibay** **125-129**
- Synthesis and Antibacterial Activity of Pregnenolone-Vitamin B1 Conjugate
Lauro Figueroa Valverde, Francisco Díaz Cedillo, Guillermo Ceballos Reyes, María López Ramos* **130-135**

- The Production of Biodiesel from Blended Commercial Oil in Mexico: A Comparative Study
*Bárbara Arévalo, Belem Facio, Andrés Jiménez, Eduardo Rogel-Hernández and Heriberto Espinoza-Gómez** **136-139**
- Porometry Studies of the Polysulfone Membranes on Addition of Poly(ethylene Glycol) in Gelation Bath During Preparation
*S. Javiya, Yogesh, S. Gupta, K. Singh, and A. Bhattacharya** **140-144**
- g-Lactones Upon Double Nucleophilic Additions of *Bis*(TMS)Ketene Acetals to P-Systems and Access to New-Towards Cancer Cells Cytotoxic-Endoperoxide Lactones
Henri Rudler, Eugenia Aldeco-Pérez, Andrée Parlier, Cecilio Álvarez, Patrick Chaquin, Patrick Herson, Alfredo Toscano, and María-Teresa Ramírez-Apan* **145-174**
- Titanium-modified MCM-41 Prepared by Ultrasound and by Hydrothermal Treatment, Catalysts for Acetylation Reactions
Deyanira Angeles-Beltrán, Guillermo Negrón-Silva, Leticia Lomas-Romero, Martín A. Iglesias-Arteaga, Francisco J. Cadete Santos-Aires **175-180**
- Enzymatic Hydrolysis of *N*-protected 2-Hydroxymethylpiperidine Acetates
Aida Solís, Artemio Nava, Herminia Inés Pérez, Norberto Manjarrez, Héctor Luna, Julia Cassani* **181-184**
- On-line methodology for the trace level determination of the chlorinated phenol family in water samples
Ana María Nuñez-Gaytán, Luz Elena Vera-Avila and María del Rosario Covarrubias-Herrera* **185-192**
- Investigation and Optimisation of the Use of Spectrophotometry for the Assay of Simvastatin with *in situ* Bromine and Three Dyes as Reagents
Kanakapura Basavaiah and Kalsang Tharpa* **193-200**
- Structure-activity of Sansalvamide A Derivatives and their Apoptotic Activity in the Pancreatic Cancer Cell Line PL-45
*Rodrigo A. Rodriguez, Po-Shen Pan, Robert C. Vasko Chung-Mao Pan, William S. Disman, Shelli R. McAlpine** **201-211**
- Characterization of Silicon Rich Oxides with Tunable Optical Band Gap on Sapphire Substrates by Photoluminescence, UV/Vis and Raman Spectroscopy
Ragnar Kiebach, Jose Alberto Luna-López, Guilherme Osvaldo Dias, Mariano Aceves-Mijares, Jacobus Willibrordus Swart* **212-218**
- Studies on Biologically Significant Copper (II) / Manganese (II) / Uranyl (II) – Isoleucine Binary Complexes
Brij Bhushan Tewari **219-223**
- Diindolylmethane Derivatives as Apoptosis Inductors in L5178y Cells
*Benjamín Velasco-Bejarano, Luvia Enid Sánchez-Torres, José Guadalupe García-Estrada, René Miranda-Ruvalcaba, Cecilio Álvarez-Toledano, Guillermo Penieres-Carrillo** **224-228**
- Use of Experimental Design for Calibration and Validation of Ascorbic Acid and Citric Acid Mixtures
Fuensanta Sánchez Rojas, C. Bosch Ojeda, A. J. Ruiz Sánchez, M. Espinosa Bosch **229-234**
- Morphology and Corrosion Performance of Chromate Conversion Coatings on Different Substrates
Miguel Antonio Domínguez-Crespo, Edgar Onofre-Bustamante, Aidé Minerva Torres-Huerta and Francisco J. Rodríguez-Gómez* **235-240**
- Theoretical study of reactivity based on the hard-soft/acid-base (HSAB) in isatoic anhydride and some derivatives
Fernando R. Ramos-Morales, Sergio Durand-Niconoff, José Correa-Basurto, Francisco J. Meléndez-Bustamante, and J. Samuel Cruz-Sánchez **241-248**
- Electrochemical treatment of synthetic wastewaters containing Alphazurine A dye: Role of electrode material in the colour and COD removal
José L. Nava, Marco A. Quiroz and Carlos A. Martínez-Huitile** **249-255**
- Recent Trend in Ozone Levels in the Metropolitan Zone of Mexico City
Javier Audry Sánchez and Francisco Javier Garfias Ayala **256-262**
- Mercury Speciation in Contaminated Soils from Old Mining Activities in Mexico Using a Chemical Selective Extraction
Irma Gavilán-García, Elvira Santos-Santos, Luis R. Tovar-Gálvez, Arturo Gavilán-García, Sara Suárez, Jesús Olmos* **263-271**
- Controlled release of model substances from pH-sensitive hydrogels
David Quintanar-Guerrero, Briza Nadyr Zorraquín-Cornejo, Adriana Ganem-Rondero, Elizabeth Piñón Segundo, María Guadalupe Nava-Arzaluz and José Manuel Cornejo Bravo* **272-278**
- Editorial**
- Trigésimo Aniversario del Departamento de Química de la Universidad Autónoma Metropolitana
Ignacio González **1-2**
